

Radhika Amipara

Python Developer

+91 8849943029 | amipararadhika@gmail.com | [Linkedin](#) | [GitHub](#) | Ahmedabad, Gujarat

SUMMARY

Python Developer with hands-on experience in **Python, Django, REST APIs, SQL, MySQL, Git/GitHub, and Docker**. Strong understanding of **Object-Oriented Programming, backend development, database concepts, API integration, debugging, and clean code practices**. Familiar with **FastAPI, Django ORM, Linux, async/await, and AWS**. Passionate about building scalable backend applications and continuously learning modern Python development technologies.

EDUCATION

Master of Computer Application(MCA) 2025 - 2027
Sardar Vallabhbhai Global University Ahmedabad
SEM 1 - CGPA : 8.54 | SEM 2 – CGPA : 8.90

Bachelor of Computer Application(BCA) 2022 - 2025
SMT K.S.N. Kansagra Mahila College Rajkot
PERCENTAGE : 78% | CGPA : 8.36

SKILLS

- **Programming:** Python, OOP, Data Structures & Algorithms, Exception Handling
- **Backend:** Django, FastAPI, REST APIs, Django ORM
- **Database:** MySQL, PostgreSQL, SQL, Database Design, CRUD Operations
- **Tools & Version Control:** Git, GitHub, Docker, Postman
- **Web:** HTML, CSS, JavaScript
- **Python Concepts:** Functions, Modules, File Handling, Async/Await, Virtual Environments
- **Cloud & OS:** AWS, Linux, Basic Cloud Deployment
- **Other:** Debugging, Unit Testing, API Testing, Code Documentation

PROJECTS

FastAPI Task Management API | Python | FastAPI | PostgreSQL | SQLAlchemy | Docker | Git ([Link](#))

- **Developed a RESTful Task Management API using Python and FastAPI** with CRUD operations for task and user management.
- **Implemented SQLAlchemy ORM with PostgreSQL** to manage relational data and database operations efficiently.
- **Applied Object-Oriented Programming and reusable Python modules** to maintain clean, structured, and maintainable backend code.
- **Implemented API validation, exception handling, and error responses** to improve application reliability and user experience.
- **Containerized the application using Docker** and used Git/GitHub for version control and collaborative development.
- **Tested and debugged REST APIs using Postman** and documented API endpoints for easy integration and maintenance.

Django E-Commerce Backend API | Python | Django | Django REST Framework | MySQL | Docker | Git ([Link](#))

- **Built a Django-based e-commerce backend** with product, user, cart, and order management.
- **Developed REST APIs using Django REST Framework** with authentication, validation, and CRUD operations.
- **Integrated MySQL using Django ORM** for efficient relational database management.
- **Implemented reusable components, exception handling, and clean coding practices** for maintainable backend services.
- **Containerized the application with Docker** and used Git/GitHub for version control and documentation.

CERTIFICATIONS

- AWS Skill builder – AWS Cloud Practitioner Essentials
- FreeCodeCamp – Python Developer
- SkillUP – Advanced Python
